Profile

Passionate and user-focused UI/UX Designer with foundational experience in designing functional, visually engaging interfaces for web and mobile. Proficient in Figma, with hands-on knowledge of wireframing, prototyping, and UX research. Adept at collaborating with cross-functional teams to bring creative ideas to life, balancing user needs with business objectives. Eager to continue developing design skills and contribute to meaningful projects that enhance usability and user satisfaction.

Education

2016 – 2020 **Microbiology (B.Sc)**
Bayelsa State, Nigeria *Federal University Otuoke*

Professional Experience

- 2024/07 – 2024/10 **UI/UX Designer**
United Arab Emirates *FLUD*
- Collaborated with cross-functional teams to design and refine user interfaces for FLUD's mobile app, focusing on enhancing user experience and accessibility.
 - Conducted usability testing, translating insights into design improvements that streamlined user flows and improved key metrics, such as task completion time.
 - Created interactive prototypes in Figma, illustrating user interactions and presenting clear, effective design solutions to stakeholders.
 - Designed and implemented consistent, brand-aligned UI elements, contributing to an intuitive and cohesive visual identity across digital platforms.
- 2023/04 – 2024/07 **UI/UX Intern**
Nigeria *Youthrive by Access Bank*
- Supported the design team in creating user-friendly and visually engaging interfaces for Youthrive, a platform focused on empowerment for young adults.
 - Assisted in conducting user research, gathering insights to inform design decisions and improve the user journey across web platforms.
 - Developed wireframes and low-fidelity prototypes in Figma, contributing to early-stage designs and refining user flows based on team feedback.
 - Collaborated with senior designers and developers to ensure alignment with brand guidelines and maintain design consistency, gaining hands-on experience in agile project environments.

Projects

FLUD App

Fuel and Car Maintenance Mobile App

The FLUD App allows users request on-demand fuel and car maintenance services with just a few taps on their mobile device. It utilizes AI and machine learning technologies to optimize routing and dispatch of delivery riders.

EchoMed

Telemedicine Web App

EchoMed is a telemedicine application designed to enhance virtual healthcare interactions by allowing patients to book and manage appointments with doctors conveniently. It provides a streamlined registration process for patients, enabling them to create personal profiles and schedule multiple appointments as needed.

SterlClone

Fintech Mobile App

Sterlclone is a fintech mobile application designed to provide users with seamless access to various financial services. Its features are likely tailored to enhance financial management, enabling users to conduct transactions, manage accounts, and engage with financial products efficiently.

YoShop

Mobile Grocery Shopping App

Yoshop is a mobile grocery shopping app designed to offer users a convenient way to purchase a wide variety of grocery items. It focuses on providing discounts and deals. Yoshop also emphasizes a user-friendly shopping experience with features such as free shipping globally, making it accessible to a broad audience.
